

Specialist's programs

In comparison with Bachelor's programs, Specialist courses are more focused on practical work in the selected field of study. These programs are available to applicants who have education equivalent to Russian general secondary or vocational secondary education. The course lasts for 5 or 6 years. A Specialist Degree allows to start a working career or to continue studies on a Master's or other postgraduate course.

Specialist's programs available at PetrSU for 2023/24 academic year

Course code	Program name	Tuition fee (rubles per academic year) 2022/23	Exams
